Reusable Shoe Covers

MAKRO™

The **MAKRO™** washable and reusable shoe covers are manufactured to enclose the foot up to the ankle, for complete protection. Made with quality fabric and workmanship, they are waterproof, highly anti-skid, low linting, durable and safe for use in EDS settings. Their soles are engineered to prevent scuff marks on the floor.

MAKRO™
Reusable Shoe Covers

Benefits: Designed for indoor use, **MAKRO™** qualify for static dissipation and are an excellent choice for ESD-ElectroStatic Discharge sensitive environments. They are cleanroom compliant and suited for controlled environments with their low particle shedding count.

Superior Anti-Skid

Proprietary material soles to avoid skidding on smooth floors.

Reinforced Stitching

Double stitched seams for an extended life span.

Versatility: The gunmetal **MAKRO™** come in four sizes: Small, Medium, Large and Extra-Large to fit most shoe and boot sizes. They are easy to care for: machine washable in cold water with a bleach-free regular detergent, and let air dry for a 6-9 month life span of normal daily use.

Packaging: Each pair is individually packed in a bag.

The **MAKRO™** shoe covers are not made with natural rubber latex and they are silicone free.
