Shoe Covers For Professionals

Over the years, we have developed extensive expertise in manufacturing shoe covers for use in industries concerned with compliance and cross-contamination. We design our products for practicality and we package them for convenience.

Shoe Cover Expertise

Our experience in manufacturing shoe covers enables us to maintain the delicate balance between product engineering, production efficiency and cost control. This is what makes us capable of offering competitive and superior products.

Personalized Shoe Covers

We work with you to select the fabric, form and fit to best suit your requirements and we can print your personalized design, logo or special message on your shoe covers.

Ideal Use: Pharmaceutical, labs and general protection from wet shoes.

The Azure disposable shoe covers are ideal for a high level of protection. They are made with a fabric coated with an advanced anti-skid formula. They offer an absorbent inner layer with an anti-skid and waterproof outer layer. They stand out with their brilliant sky blue color.

Benefits

Azure combines waterproof and superior anti-skid characteristics to provide excellent protection against cross-contamination, especially from fluids and powders.

Versatility and fit

These shoe covers are available in two sizes; Universal or Extra Large. The Universal fits to most shoe sizes, and the Extra Large best fits bigger shoe sizes or bulky work boots.

The Wave disposable shoe covers are made of a polypropylene fabric and are 100% latex and silicone free. They are excellent for transitioning between “clean” and “unclean” areas. These shoe covers are popular in medical and pharmaceutical environments, GMP facilities, pre-cleanroom gowning zones and general hygiene use.

Benefits

The Wave’s high quality fabric and strong welds set them apart from imported shoe covers. They are constructed with triple-elastic runs that allow a smooth wrap around the foot in order to prevent tripping.

Versatility and fit

For added convenience, they come in 3 sizes: Universal, Extra Large, and 2XL. The Universal fits most shoe sizes, whereas the Extra Large fits bigger shoes, and the 2XL fits bulkier work boots.

They are also available without the anti-skid print pattern on the sole.

WAVE
Shoe Covers Shown with
Anti-Skid Print Pattern

Ideal Use: Medical, dental, pharmaceutical, labs, GMP facilities and general hygiene.

Packaging

The Wave shoe covers come in many packaging options to accommodate different user needs. They are available in **Easy Open bags**, **Easy Pull-Out dispenser boxes** or **Economy bulk packages** (bags or dispenser boxes). The dispenser boxes are convenient and practical for small spaces such as reception areas or transition zones.

The Bonzo shoe covers are a cost-effective solution for general protection against liquids and dirt. They are made with a CPE (Chlorinated Polyethylene) film that has a textured surface for added anti-skid properties. The Bonzo line consists of 3 products;

Bonzo Econo is a lightweight and economical option for basic protection. It is ideal for short-term use.

The **Bonzo White** and **Bonzo Blue** shoe covers are made with a heavier CPE film for added resistance. This gives them excellent waterproofing properties for typical everyday use.

The **Bonzo HD** shoe covers are made with a high density film that offers superior strength and resistance. They are designed to provide the highest protection that is required by professionals.

Ideal Use: Economical general protection from liquids, dirt or wet environments.

Benefits

These shoe covers are lightweight, economical and waterproof.

Versatility and fit

The Bonzo Econo, Bonzo White and Bonzo Blue are made to fit most shoe sizes and can be used on a variety of floors, whereas the Bonzo HD is adapted for large work or snow boots for the more demanding applications.

The Iris and Cosmic family of disposable shoe covers are the right choice for GMP or research facilities, pharmaceutical production or labs that require advanced barrier protection especially in clean environments. Iris and Cosmic share the same design and construction, they only differ in color.

They are made of a proprietary fabric that has higher wear resistance, fluid resistance and anti-skid properties for better foot grip. They are tested for linting compliance for cleanrooms up to class ISO 5 (FED STD 209E Class 100) and available in double-bag packaging.

Ideal Use: Cleanrooms, pharmaceutical, medical, labs, GMP or research facilities.

Benefits
Perfect for clean environments and easy to put on with excellent foot fit. They are waterproof, strong and slip-resistant. Their seamless bottoms and walls make them very low linting and ideal for professional work environments.

Versatility and fit
They are available in two sizes. The Universal size is made to fit most shoe sizes and the Extra-Large size is made for bigger shoes or work boots. Both sizes are available in bags or dispensing boxes.

FRESH

Ideal Use: Short-term protection for wet, slippery or powdered floors.

The Fresh disposable shoe covers offer excellent value and protection for short-term usage. They are made of a light weight fabric with an advanced anti-skid coating reflecting a pearly white color.

Benefits

The Fresh shoe covers have superior anti-skid and waterproofing properties, providing excellent grip on wet, slippery or powdered floors.

Versatility and fit

These shoe covers come in Universal or Extra Large sizes. The Universal size fits most shoe sizes, and the Extra Large size is recommended for bulky work boots. They are packaged either in bags or dispenser boxes.

RAVE

Ideal Use: Contractors, tradesmen, rough floors, farming, industrial, construction sites.

The Rave disposable shoe covers are designed specifically to respond to the needs of tradesmen or industries such as steel, oil and rubber. They are also excellent for contractors such as plumbers, home-installation technicians or similar professionals that wear steel-toe boots.

Made with a polypropylene fabric bonded with a textured polyethylene film, Rave is highly distinguishable by its vibrant red color.

Benefits

These shoe covers offer excellent and reliable protection thanks to the superior strength and water resistance.

Versatility and fit

The Rave shoe covers are available in two sizes; Universal and Extra Large and come in either bags or dispenser boxes.

KAHUNA

Ideal Use: Large and resistant, perfect for service and industrial professionals.

The Kahuna disposable shoe covers offer a superior level of protection for service or industrial professionals. They are specially designed for bigger shoe sizes or work boots.

Benefits

These shoe covers are available in two options: Kahuna and Kahuna Pro.

Kahuna is made out of a black polypropylene fabric with an anti-skid print pattern. It is suited for most needs.

Kahuna Pro is made out of a navy blue heavier fabric and is designed for the more demanding applications or environments.

Except for fabric weight, both versions share the same size, design and construction.

JAZZ

Ideal Use: More demanding applications and anti-skid. Superior protection.

The Jazz disposable shoe covers are ideal for a higher level of protection. Their fabric is coated with an advanced anti-skid formula for more adherence. They offer longer durability and more protection. They are distinguished by their hearty blue colour.

Benefits

The Jazz shoe covers are excellent for advanced protection. They have superior anti-skid and waterproofing properties, providing excellent grip on wet, slippery or powdered floors.

Versatility and fit

These shoe covers come in Universal or Extra Large sizes. The Universal size fits most shoe sizes and the Extra Large size is recommended bulky work boots. They are packaged either in bags or dispenser boxes.
